1. An examiner's amendment to be record appears below. Should the changes and/or additions be unacceptable to the applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Amend claim 24 to read as follows:

(24 amended) A digital program code product for an electronic trip unit for decompressing a compressed digital input signal to restore the linearity of said signal comprising:

a code segment that receives the compressed digital input signal;

a code segment that stores the signal into a register;

a code segment that informs an executable program of the **signal's** arrival in said register; and

a code segment that operates on the signal using an algorithm that decompresses the signal and restores the signal linearity.

This amendment is being made by Examiner's fiat. No authorization for this Examiner's Amendment was required as it is solely directed towards an obvious misspelling error (line 6, [signal's] to --**signal's**--).

2. Claims 1-26 are allowable over the prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor suggests the claimed combination of non-linear amplification of an analog signal with the resulting signal being compared to a pre-determined trip limit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "*Comments on Statement of Reasons for Allowance.*"

4. The prior art made of record but not relied upon is deemed pertinent to applicant's disclosure.

Kotzin (4,839,923) discloses time companding of analog signals.

Bernstein (5,010,410) discloses signal companding.

Chu *et al.* (5,422,643) discloses a high dynamic range digitizer.

Newton (5,978,757) discloses post storage signal compaction.

Oberhammer *et al.* (6,031,478) discloses an extended dynamic range wideband receiver.
